

INDICATIONS:

- Congestive cardiac failure.
- Hypertension.

CONTRAINDICATIONS:

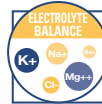

- Pregnancy, lactation, growth.
- Hyponatraemia.
- Pancreatitis or history of pancreatitis.
- Hyperlipidaemia.

FEEDING DURATION:

The diet should be started as soon as the first signs of heart disease occur. Nutritional management will be continued for the dog's lifetime.

• Dogs with cardiac disease often show decreased appetite and weight loss. Due to its very high palatability and its high protein and energy concentration, Cardiac diet is adapted for the maintenance of an optimal bodyweight.

• Sodium restriction helps reduce workload on the heart. Potassium and magnesium levels are adapted to optimum levels.

• Taurine and L-carnitine are essential for myocyte function and they also help maintain heart contractility.

• Low sodium diets help reduce fluid retention associated with cardiac disease.

FURTHER INFORMATION:

Pets with cardiac disease are more prone to oxidative stress. Flavanols, green tea polyphenols, neutralise free radicals. They also help maintain tissue perfusion by stimulating the endogenous production of nitric oxide (a local vasodilator)

KEY VALUES (per 100 g dry matter)*:

Protein:	32.1 %
Fat:	26.4 %
Carbohydrate:	30.6 %
NFE:	32.8 %
Dietary fibre:	6.0 %
Crude fibre:	3.8 %
Metabolisable energy (C)*:	497.4 kcal
Omega 6:	1.4 %
Omega 3:	5.3 %
EPA+DHA:	1.9 %
Calcium:	1.5 %
Phosphorus:	0.8 %
Sodium:	0.64 %
Potassium:	0.2 %
L-carnitine:	90.6 mg
Polyphenols:	140 mg

Synergistic antioxidant complex:

Vitamin E:	94 UI/kg
Vitamin C:	26 mg/kg
Taurine:	811 mg/kg
Lutein:	0.64 mg/kg

* According to ATWATER's equation

Can: 410 g

INGREDIENTS:

Pork and poultry liver, pork and poultry meat, rice, fish oil, cellulose fibre, tomato powder, carrageenan, cassia gum, taurine, L-carnitine, DL-methionine, green tea extracts (source of polyphenols), trace elements (including chelated trace elements), marigold extract (rich in lutein), vitamins.

Per kg: taurine: 2.15 g, L-carnitine: 240 mg, Na: 0.5 g, Mg: 0.6g, K: 2.3 g.

RECOMMENDED DAILY INTAKE:

It is recommended to divide the daily intake into 2 meals.

Dog's weight	thin		normal		overweight	
	grammes	cans	grammes	cans	grammes	cans
2 kg	215	1/2	175	1/2	130	1/4
5 kg	425	1	340	3/4	255	1/2
10 kg	705	1 3/4	565	1 1/4	420	1
15 kg	945	2 1/4	755	1 3/4	570	1 1/4
20 kg	1165	2 3/4	935	2 1/4	700	1 3/4
25 kg	1375	3 1/4	1100	2 1/2	825	2
30 kg	1570	3 3/4	1255	3	940	2 1/4
35 kg	1755	4 1/4	1405	3 1/4	1055	2 1/2
40 kg	1935	4 1/2	1550	3 3/4	1160	2 3/4
