

Dalmatian 22

ADULT > 15 months

Urinary tract maintenance

Dalmatian 22 has been specially formulated with low levels of purines to help moderate the excretion of uric acid in the urine, and thus reduce the risk of urinary stones forming.

► Sensitive skin condition

The patented complex of B group vitamins and a specific amino acid helps reinforce the skin's barrier role and helps reduce cutaneous dehydration. The addition of vitamin A helps regulate epidermal growth and production of sebum, while EPA and DHA help further support the skin.

► Cardiac tone

With a complex of taurine, L-carnitine and omega 3 fatty acids, Dalmatian 22 Adult helps support good heart muscle function.

► Intense colour spots

A strengthened phenylalanine and tyrosine content, along with amino acids essential for the synthesis of pigments, optimise the intensity of coat colour.
