

INDICATIONS:

- Chronic Renal Failure (CRF) in the adult dog
- Reduction of recurrence of urolithiasis requiring urine alkalinisation: urate and cystine uroliths
- Reduction of formation of oxalate stones in dogs with impaired renal function

CONTRAINDICATIONS:

- Pregnancy, lactation, growth
- Pancreatitis or history of pancreatitis
- Hyperlipidaemia

FEEDING DURATION:

Provides dietary support in chronic renal failure including early renal failure. Renal Canine should be fed for the pet's lifetime. Regular veterinary checks are advised.

• A high fish oil content (source of EPA & DHA) helps maintain the glomerular filtration rate (GFR) and protect against glomerulosclerosis.

• Increased uraemia may induce the formation of gastric and intestinal mucosa ulcers. The combination of zeolite with FOS helps protect the mucosae.

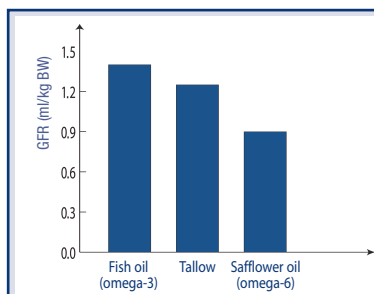

• During CRF, phosphorus is no longer eliminated effectively by the kidneys. A restriction in phosphorus intake is an essential part of nutritional support.

• The synergistic antioxidant complex (vitamin E, vitamin C, taurine, lutein) neutralises free radicals and helps maintain the health of DNA and the immune system.

FURTHER INFORMATION:

Feeding a diet enriched with fish oil helps maintain the glomerular filtration rate (GFR).

Three groups of 7 dogs with CRF monitored for 20 months.

KEY VALUES: (per 100g dry matter)

Protein:	18.9%
Fat:	24.9%
Carbohydrate:	44.1%
NFE:	49.5%
Dietary fibre:	6.8%
Crude fibre:	1.4%
Metabolisable energy (C)*:	497 kcal
Omega-6:	4.54%
Omega-3:	1.49%
EPA & DHA:	1.35%
Calcium:	0.68%
Phosphorus:	0.27%
Sodium:	0.19%
Potassium:	0.9%
Vitamin D3:	131IU/kg

Synergistic antioxidant complex:

Vitamin E:	78mg
Vitamin C:	22mg
Taurine:	432mg
Lutein:	0.37mg

*According to ATWATER's equation

Can: 430g

INGREDIENTS:

Pork and poultry meat, rice, pork and poultry liver, maize flour, fish oil, powdered egg white, sunflower oil, minerals, beet pulp, carrageenan, cassia gum, taurine, Fructo-Oligo-Saccharides (FOS), marigold extract (rich in lutein), trace elements (including chelated trace elements), vitamins.

RECOMMENDED DAILY INTAKE:

It is recommended to divide the daily intake into 2 meals.

Dog's weight	thin		normal		overweight	
	grammes	cans	grammes	cans	grammes	cans
