FEEDING DURATION:

Begin nutritional support at the first appearance of clinical signs; benefits can be seen within 2 months. In case of chronic disease, continue Skin Support diet for the dog's entire lifetime.

• Synergistic action of the patented complex (turmeric, aloe vera, vitamin C and taurine) promotes health of the skin's natural defences and supports the healing process.

• High levels of biotin, niacin and pantothenic acid combined with a zinc-linoleic acid blend decrease transepidermal water loss and support the skin barrier effect.

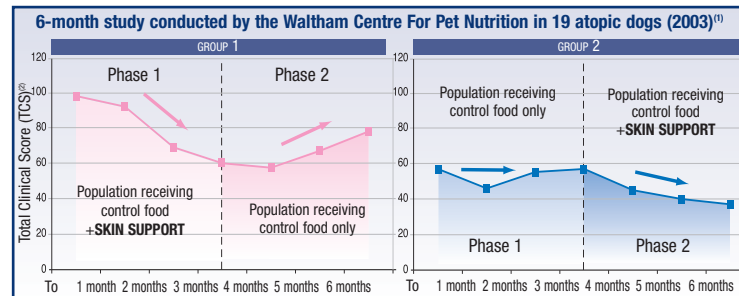

• Eicosapentaenoic and docosahexaenoic acids, long-chain omega-3 fatty acids, help maintain skin health.

• The synergistic antioxidant complex helps neutralise the free radicals produced by damaged skin.
