

INDICATIONS:

Adult dogs that are prone to the two major risks:

- Osteo-articular problems,
- Gastrointestinal problems.

PRODUCT ADVANTAGES:

Chondroitin inhibits enzymatic action on chondrocytes and hydrates cartilage. Glucosamine stimulates the synthesis of glycosaminoglycans and hyaluronic acid. The synergistic antioxidant complex (vitamins E and C, taurine and lutein) neutralises free radicals. The fatty acids EPA-DHA also promote joint health.

The combined fermentable fibre (beet pulp, FOS) promotes a proper balance of the digestive microflora and helps protect the intestinal mucosa. Mannan-Oligo-Saccharides (MOS) support local immunity in the intestine (IgA).

The synergistic antioxidant complex (vitamin E, vitamin C, taurine and lutein) helps maintain health of cell DNA, promotes health of the immune system and neutralises free radicals.

Protein digestibility is increased by selecting protein that is highly digestible in the intestine (wheat gluten, poultry protein isolate), thus decreasing the amount of protein entering the colon by 20-40%.

FURTHER INFORMATION:

Chondroitin sulphate and glucosamine inhibit the enzymatic action that leads to cartilage destruction, ensure cartilage hydration and stimulate its turnover.

KEY VALUES:

| | |
|---------------------------------------|--------------|
| Protein: | 25 % |
| Fat: | 17 % |
| Carbohydrate: | 36.7 % |
| Dietary fibre: | 6.5 % |
| Crude fibre: | 3 % |
| Metabolisable energy*: | 4138 kcal/kg |
| EPA+DHA: | 0.3 % |
| Omega 6/3: | 5 |
| Calcium: | 0.8 % |
| Phosphorus: | 0.5 % |
| Zinc: | 240 mg/kg |
| Chondroitin+Glucosamine: | 2000 mg/kg |
| Polyphenols from grape and green tea: | 150 mg/kg |

Synergistic antioxidant complex:

| | |
|------------|------------|
| Vitamin E: | 600 mg/kg |
| Vitamin C: | 200 mg/kg |
| Taurine: | 2600 mg/kg |
| Lutein: | 5 mg/kg |

*According to ATWATER's equation

2 and 14 kg bag

INGREDIENTS:

cereals (maize, rice), animal fats, wheat gluten, dehydrated poultry meat, poultry protein isolate, poultry liver, beet pulp, minerals, vegetable oil, fish oil, zeolite, Fructo-Oligo-Saccharides (FOS), trace elements (including chelated trace elements), yeast extract (source of manno-oligo-saccharides), green tea and grape extracts (source of polyphenols), DL-methionine, L-tyrosine, taurine, hydrolysed crustaceans (source of glucosamine), hydrolysed cartilage (source of chondroitin), marigold extract (source of lutein), vitamins.

Actual size

RECOMMENDED DAILY INTAKE:

| | Adult weight (kg) | 2 | 5 | 7 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 | 55 | 60 | 70 | 80 | 90 | 100 |
|------------|-------------------|-----|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|--------|
| Thin | grammes per day | 60 | 115 | 145 | 190 | 255 | 315 | 370 | 420 | 470 | 520 | 565 | 610 | 655 | 695 | 780 | 860 | 935 | 1010 |
